

HI-VIZ Safety Edging for Trade Shows & Displays

Features

- Bright yellow **PAVE EDGE RIGID**
- Lipped design enables **HI-VIZ** to hold pavers and sand in place
- Reduces trip hazards
- Transitions nicely from an aisle to booth area
- Easy to install
- 6' lengths

HI-VIZ SAFETY EDGING not only makes your display safer, it accents the display nicely. This yellow edging serves as a transitional strip from the floor to the top of the display, reducing tripping while holding it together.

Miter cut **HI-VIZ** for a neat and professional appearance. To install **HI-VIZ** lay it down along the perimeter of the booth and tape the lip to the floor, then fill with sand. This allows you to not only lay pavers, but also fill the joints with sand as you normally would. With **PAVE EDGE's** patented frost-heave sand retention lip, you won't have to worry about sand migrating from your booth area.
