It’s all about “the wrap”!

By “wrapping” PAVE EDGE Industrial or PAVE EDGE PRO edging with the Geo-Grid, you’ll create the strongest and most durable restraint throughout the permeable pavement system. PAVE TECH introduced the Geo-Grid Wrap Method in 1997 to address securing the edging to the base without the use of spikes. Sections of the Geo-Grid are laid on top of the base (under the edging, bedding, and pavers), then wrapped around PAVE EDGE Industrial, Rigid, or Flexible and brought back under the pavement. This eliminates the need for labor-intensive and time consuming attachment of Geo-Grid to the edge restraint. The Geo-Grid interlocks with the base, bedding, and pavers to integrate with the pavement system.

**GEO-GRID WRAP Method**

**Overlay Method**

- Great for tradeshows and displays
- Safety bright yellow PAVE EDGE

**HiViZ™ Safety Edge Restraint**

HI-VIZ Safety Edging makes your display safer by serving as a transitional strip from the floor to the top of the display, reducing tripping while holding it together.

- Segmental pavement installation over concrete or asphalt surface
- Overlays rehabilitate old pavements
- Pavement area can remain the same size or can be enlarged
- Details on website

### Poly Vinyl Chloride
- 100% virgin and recycled, environmentally safe PVC
- Superior strength PVC has “memory”. It moves under load it returns to original shape

### Triangular, Reinforced Design
- Ensures vertical wall stays perpendicular to the pavement
- Best structural support for straight edges & smooth curves
- Hollow core design does not act as a heat sink
- Allows a minimum of 2” top soil or sod above PAVE EDGE to top of paver

### Frictional Holding Rib
- Provides lateral load resistance by ‘biting’ into the aggregate base (US Patent # 5,073,061)

### Frost Heave / Sand Retention Lip
- Utilizes downward pressure of load and weight of pavers to lock edging into base
- Guarantees edging will move with pavement system under all weather conditions
- Bedding sand will not migrate

### Pre-Drilled Spike Holes
- Accommodates 1/4” diameter steel landscape spikes
- Spaced every 12” on RIGID. For further strength, drive spikes anywhere along the back support
- FLEXIBLE has one hole per back support to provide optimal support on curves

### Connector Tubes
- Pre-inserted into the ends of PAVE EDGE for seamless connections at all joints

### Engineer Tested & Proven

Stork Twin City Testing Corporation did mechanical engineering pavement loading & deformation testing on material, design, and spiking frequency that prove PAVE EDGE is the highest performing edging in the industry!

The superior design and material resists movement and makes PAVE EDGE Restraint outperform all others! The higher the load, the difference between Pave Edge & competitors grow!

PAVE EDGE PRO

- Best defense against shifting and deformation
- Contains up to 60% more material by weight per foot than other paver edge restraints
- Environmentally engineered with up to 75% recycled PVC material
- Designed for pedestrian, vehicular and commercial applications
- Eliminate frost heave with the lip

PAVE EDGE Industrial has proven itself for decades to be the most economical alternative to poured-in-place concrete curbs on heavy-duty, commercial, & industrial applications. It is the best performing, lowest labor, lowest material cost per foot of any industrial edge restraint.

- Longer extended lip with thicker walls and additional frictional ribs
- Designed for 3-4" (8-10 cm) commercial/industrial pavers
- 10 ft long, straight, one-piece sections
- Pre-drilled holes 6" apart alternating backside/front extension lip
- Connector Pipe shipped one 10 ft section per carton of 120 ft to allow cuts as needed.

</table>

RIGID

PAVE EDGE Rigid can be used as a flexible edge restraint. A 7 ft section can be flexed slightly to produce a contour with a radius limit of approximately 17 ft. The rigid model is ideal for straight runs and gentle curves with minimal spikes.

ESSENTIAL TOOLS

POUNDER™

Our original heavy-duty slide hammer that puts your compaction force (up to 5,000 lb) exactly where needed. In small areas, tight corners and directly next to foundations.

Included:

- 6” x 6” (15 x 15 cm) Tamper Bit - Optimum size for deepest compaction (up to 5,000 lb of force)
- Pounder Shaft: 20 lb hardened steel hammer is 39” (99 cm) long
- Quick pin for easy bit change
- Accepts standard 1 ⅛" hex shank bits

PRO TIP
A 6” x 6” plate generates the highest compaction. When increased to an 8” x 8” plate you lose 40% of compaction. The larger the plate, the less compaction.

BaseRAKE™

BaseRAKE’s solid edge spreads material evenly and efficiently without gravel separation. The solid head will not separate the fines from larger aggregates unlike other rakes. The serrated edge is used to loosen high spots after compaction. It’s also great for spreading joint sand.

- Long handle provides better angle when spreading material
- Magnesium - strong, lightweight
- Handle Length and Diameter: 7 ft (213 cm) L x 1.5” dia. (3.8 cm)
- Handle options of 2 piece or 1 piece

KneeSEAT™

KneeSEAT positions the knee and ankle at a proper angle providing support and comfort to the back, shoulders, and neck.

- Ergonomic knee protection & ankle support
- Back relief while kneeling or sitting
- Aluminum tubing now double thickness for strength

PRO TIP
Spreading joint sand dries the material as you fill the joints (up to 10x faster than trying to fill joints with wet sand).

Part # Description Weight Trade Price
029054 Pounder (Tamper Bit Included) 32 lb (9 kg) $362

CT75020 48” (122 cm) Head 49” x 7” x 7” (125 x 18 x 18 cm) 1.8 lb (0.8 kg)  $27

*DOES NOT INCLUDE HEAD
Hammers

Wall Mallet
• 3 ¼" (80 mm) interchangeable heads
• Cast Iron Head Collar
• Includes 1 Black Medium Hard Rubber and 1 White Very Hard Nylon Head

Paver Mallet
• 2 ¼" (60 mm) interchangeable heads
• Cast Iron Head Collar
• Includes 1 Black Medium Hard Rubber and 1 Red Hard Plastic Head

Tumbler
• Gives factory tumbled look
• Creates a “split face” after saw cutting
• Use on retaining wall block or pavers
• Hardened forged Steel Head

Deadblow
• Welded Steel Head
• Includes 2 White Very Hard Nylon Heads

Sledge Mallet
• 3 ¼" (80 mm) interchangeable heads
• Cast Iron Head Collar
• Includes 1 Black Medium Hard Rubber and 1 White Very Hard Nylon Head

PaverPersuader™
• Designed for tightening loose field pavers
• Angled head hits low on the paver to reduce paver rotation and disturbing bedding
• Replaceable heads
• Handle Length: 32” (81 cm)

PaverCart™

Optimize your efficiency on the job site with the PaverCart! Move material with less time & energy. No more wheelbarrows.

• 12” diameter pneumatic tires
• Zinc Plated, high tensile steel
• Over-center cam action clamp handle
• Bottom roller for rolling on & off pallets
• Works with many banded or unbanded pavers
• Carrying Capacity: 880 lb (400 kg)

Essential Tools

Part # Description Weight Handle Length Lifting Capacity Trade Price
CT50010 Paver Mallet 4 lb (1.8 kg) 13” Hickory 205 lb (92 kg) $ 64
CT50012 Wall Mallet 7 lb (3.2 kg) 19” Hickory 99

CT50013 Deadblow Model 375 12” Hickory 3.8 lb (1.7 kg) $ 76
CT50014 Deadblow Model 500 12” Hickory 5 lb (2.3 kg) $ 84
CT50028 Tumbler 13” Hickory 3 lb (1.4 kg) $ 59
CT50015 Replacement Head Black (60 mm) 13” Hickory 3 lb (1.4 kg) $ 17

012060 PaverPersuader 6 lb (2.7 kg) 32” (81 cm) $ 87

PalletWagon™

PalletWagon is the only manual job site pallet mover that can move a full pallet of pavers (on a level, flat grade). Features include large diameter rubber tires, adjustable fork width, and a hand-operated hydraulic cylinder to lift load.

• Max Pallet Width: 49 1/2” (121 cm)
• Max width between adjustable forks: 18” (46 cm)
• Width overall: 64” (162 cm)

Part # Description Length Lifting Capacity Weight Trade Price
011513 PalletWagon 56” (142 cm) 3,300 lb (1,500 kg) 430 lb (195 kg) $4,004
**PAVERADJUSTER™**

- Replaceable spring steel blade
- Hand and foot rests to help drive into joint
- Zinc Plated
- Easiest and fastest way to adjust bond lines

**SLABADJUSTER™**

- Four adjustable blades
- Speeds up alignment process
- Two grips and one hammering point
- Head Width 25.5” (65 cm)

**PAVEREXTRACTOR™**

The professional’s answer to paver removal. Replaceable serrated spring steel teeth extract a large variety of pavers. Removing pavers with a PAVEREXTRACTOR saves time and protects the surrounding pavers. Save time and money with the right tool for the job.

- Quick pin for fast adjustments
- Zinc plated

**PAVERPULLER™**

- Fast removal of unsanded pavers
- Opening Range: 4” - 15” (9 - 40 cm)

**PAVERPAW™**

- For installation of larger than one hand pavers, not removal of pavers
- Replaceable serrated spring steel gripping teeth
- Increase production
- Operating Range: 6” - 10” (15 - 25 cm)
- Lifting Capacity: 22 lb (10 kg)

**PAVERTONGS™**

- Carry between 7 - 11 pavers/bricks
- Heavy duty design for professional use

### PRO TIP

After using water as lubricant, use putty knife to loosen & remove poly sand first.
**SlabGRABBER™**

- For installation, not removal
- Accommodates most slabs & retaining wall blocks
- Pivoting heads produce excellent contact with split face
- Tight, pinch-free, placement at the laying edge
- Gripper Length: 4" (10 cm)
- Gripper Height: 1 ¼" (3 cm)
- Lifting Capacity: 130 lb (58 kg)

**BigHAND® Grab**

- Adjust, Grab, Go
- Balanced lift & carry
- Saves your back and hands
- Small plate opening range: ½" - 4"
- Large plate opening range: 4" - 8"
- Kit includes small and large plate

**PRO TIP**

For proper adjustment, make sure SlabGRABBER is at an angle of about 150° prior to lifting.

---

**HandSAVER™ Gloves**

- Breathable, stretchable cloth provides tighter fit for better dexterity
- 75% cotton & 25% polyester with a thick durable coating of slip resistant latex rubber allows hands to breathe
- Coating protects hands from scraping and the drying effects of concrete and clay

**PaverSquare™ Pro & Jr**

- **Pro** - Compact folds to 48” x 2” (122 x 5 cm)  
  Unfolds to 48” x 48” x 68” (122 x 122 x 172 cm)
- **Jr** - Compact folds to 24” x 2” (61 x 5 cm)  
  Unfolds to 24” x 24” x 33” (60 x 60 x 84 cm)

**Grade Stakes**

- Hardened Steel
- ⅜” diameter (2 cm) / ¾” long (92 cm)
- Pre-drilled 16d nail holes for forming

**StakeOut™**

- Simplest way to extract grade stakes without injury
- Twist & lift for easy removal, minimal base disruption
- For use with stakes ⅜” - 1 ⅞” in diameter
- No more broken toes
- Hold stakes for safe hammering

**LaserLevel™ Kit**

- Includes case, laser, tripod, receiver, clamp, inch grade rod and batteries
- Automatic, self-leveling laser
- 1,000 foot diameter operating range
- Waterproof receiver has front and back LCD displays
- Entire system in one case

**Dual Grade Laser Package**

- Automatic electronic self-leveling provides fast, easy, horizontal level, grade, & vertical plumb set up
- Radio remote control
- Grade range from -25% to +25%
- Rugged, survives a 1 m (3 ft) drop on concrete
- Automatic grade matching

**StringARM™**

- Quick string height adjustment
- Perfect to set grades
- 16” x 18” base plate, 18” center post, 7” arms
- Easier grade setting
- Works great in middle of a large project or multiple grade changes

**Sweeping**

**PaverBroom™**

- Only purpose designed hardscapes broom
- Broom head ends are rounded to reduce splitting
- Handle reinforcement
- Bristle stiffness & size minimizes sand retention
- Maximizes sand spreading and clean up
- Head Width: 24 in (61 cm)
- Perfect for sand and chip

**PaverSweep™**

- Orbital broom for fast jointing & site clean-up
- Efficient sweeping chip into PICP joints & normal joint sanding
- 4.5 HP Honda engine
- 36” (91 cm) diameter bristle brush
- Brush reversal with downward pressure adjustment

**Marking**

**QuickDRAW™**

- Aluminum construction
- Increase marking speed by 400-600%
- Guide tab glides easily along edge restraints
- Wheel for use against curbs and walls
- Normally for use with PaverMARKER, soapstone, and marker

**FlexMARKER™**

- Complete system for layout and marking of radii
- 2 Flexible 13 ft poles for curved borders (26 ft long)
- Anchor cleats & 12” velcro stays for fast layout
- Connect multiple poles together for unlimited length
- Up to 4 sets of poles (52 ft) fit in the carrying bag

Kit Includes:

- 8 Anchor Cleats
- 2 FlexMARKER 13 ft poles (26 ft total)
- 6 Velcro grade stake stays
- 1 Carrying bag
- 2 PaverMARKERS

**PAVERSCRIBE™**
- Pivoting angle finder to set exact angles
- Measure, lock, and mark paver angles
- Normally for use without a soldier course

**PAVERMARKER™**
- Non-permanent
- Strong composite material
- Wet/dry marker for pavers, block, and stone
- Extremely long lasting

**Templatemarker™**
- 4" x 45° marker allows you to mark cuts on 4" x 8" pavers when installing 90° & 45° herringbone
- 6 x 9 x 45° marker allows you to mark 6" x 6" & 6" x 9" pavers for 45° miter cuts and half cuts
- Complete cuts faster with less waste

**RingMARKER™ Set**
- RingMARKER template makes it quick & easy to mark 12" x 8" retaining wall block to create perfect fire rings.
  - Use with 12" x 8" block
  - 2 templates make 4 different ring diameters

**WedgieMARKER™**
- Great for soldier course and retaining wall caps
- Reduce waste, increase accuracy and speed of wedge cuts

**COMPACT SPLITTER™**
- Three sided blades
- Dimensions: 27” x 12” x 24” (68.5 x 30 x 61 cm)

**PAVER SPLITTER™**
- Improved cam design offers 20% reduction in splitting effort
- Makes undercuts
- Perfect for tumbled pavers
- Ensures tight fit of split pavers
- Four-sided blades
- Dimensions: 39” x 10” x 17” (100 x 26 x 43 cm)
- Great for caps

**WALL SPLITTER™**
- Improved cam design offers 20% reduction in splitting effort
- Provides same look and texture as factory splits
- Pivoting upper blade ensures uniform contact for clean splits
- Four sided blades
- Dimensions: 39” x 10” x 17” (100 x 26 x 43 cm)
- One fixed (rigid) table for 90° splits
- Perfect alternative to saw cutting

**SLAB SPLITTER™**
- Improved cam design offers 20% reduction in splitting effort
- Pivoting upper blade ensures uniform contact for clean splits
- Four sided blades
- Dimensions: 45” x 13” x 21” (115 x 33 x 53 cm)

**STONE SPLITTER™**
- Specifically designed for natural stone & granite, but also great for concrete or clay pavers
- Spring loaded cutting table allows for undercut
- Upper and lower segmented cutting teeth are set in rubber for full surface contact on natural, uneven stone
- Dual cam for double the splitting force
- Dimensions: 39” x 13” x 19” (100 x 33 x 49 cm)

**12V HYDRAULIC SPLITTER™**
- Removable 12 volt rechargeable battery pack
- 1” (2 cm) stroke
- Hydraulic Pressure: 46,300 lb (21,000 kg)
- Dimensions: 37” x 19” x 32” (94 x 48 x 82 cm)

**MEGA SPLITTER™**
- Heavy-duty 110 volt 13 amp hydraulic splitter
- Split hard natural stone and concrete
- Single crank quick height adjustment
- Heavy-duty table rollers & push-button operation
- 44 tons (88,000 lb of cutting force)
- Dimensions: 48” x 60” x 49” (122 x 152 x 125 cm)

---
The TYPHOON Pavement Maintenance Solutions system includes two main components—TYPHOON and PAVEVAC—requiring 2 support pieces of equipment. Both the TYPHOON and PAVEVAC are hand push devices allowing the operator to pay close attention to results and adjust speed to achieve optimum performance.

The purpose of the TYPHOON is to break through the joint crust, loosen and pneumatically excavate the joint sediment and old chip to a specified/acceptable depth in preparation to refill (re-chip) the joints.

- Uses 205 PSI (14 bar) of compressed air from trailered air compressor
- Permeable Joint Excavation
- Patented Waterless Technology!

PAVEVAC is designed to evacuate joint material debris from the surface and loose material from the joints (sediment and chip).

- Requires 27” of vacuum Hg at 5000+ CFM with a 6” hose

**SCREEDING**

**KeeROO™**

- Screed any granular material in less time than any other manual method
- Screed Standing: results in higher efficiency with less fatigue and injury
- Achieve accurate grades using typical site benchmark (slabs) curb
- When no specific grade is required, KeeROO free-hands without benchmarks; ex: topsoil/sod sport surfaces
- Cut & fill KeeROO levels soil, sand, chip, & base material
- Passes are made at various angles; cutting into high spots & pulling excess material to fill low spots
- 1,000 ft² in less than 1 man hour is common

**SandROO™**

Developed to meet the needs of sand sport court maintenance, SandROO is popular with volleyball clubs around the country. Up until now, the most common way to rake out sand was with hand rakes. The SandROO's solid, serrated blade make it easier & faster to move and level the sand. The large air-filled tires make it very easy to maneuver around & over rough terrain. Ideal for anyone that has to maintain large sand areas, volleyball courts, playgrounds, equestrian areas, & more!

### Part # Description Weight Trade Price
044310 1200A Adjustable Blade (47 - 82 in) (120-208 cm) 98 lb (44 kg) $1,603
044305 700A Adjustable Blade (27 - 47 in) (69-120 cm) 71 lb (32 kg) $1,088
044300 120A Non-Adjustable Blade (47 in) (120 cm) 84 lb (38 kg) $1,070
044450 SandRoo Non-Adjustable Blade (47 in) (120 cm) 84 lb (38 kg) $1,145
044425 WallRoo Adjustable Blade (14-24 in) (36-60 cm) 71 lb (32 kg) $1,099
044315 1200A Extension Pack w/ Handle 32 lb (15 kg) $1,070
044331 Rake w/ Attachment Clamp Assembly 15 lb (7 kg) $ 188
044435 700A Crown Blade Set 26 lb (12 kg) $ 455
044430 1200A Crown Blade Set 32 lb (15 kg) $ 578
044440 CurbRoller Attachment (Fits all models) 4 lb (1.8 kg) $ 188 ea

**SandPull™**

- 30” (76 cm) wide two-sided head combination of come along and float
- More efficient than a shovel
- Perfect width & weight to float on bedding
- Greatly reduces time on your knees troweling
- Made in US

**SandPull PRO™**

- Screed standing, not on your knees
- Made of lightweight hollow core extruded aluminum
- Will not deflect under load
- Increased screening efficiency
- Easily adjustable width
- Stainless steel extensions

### Part # Description Handle Length Weight Trade Price
022202 SandPull 6’ (182 cm) 4 lb (2 kg) $83

**Screeds Off Curbs, Edging, or Screed Rails**

### Part # Description Handle Length Weight Trade Price
022303 3 - 7½ ft System (91 - 229 cm) 6’ (182 cm) 33 lb (15 kg) $1,345
022305 7½ - 10 ft System (91 - 229 cm) 6’ (182 cm) 35 lb (16 kg) $1,345
022301 Curb Roller Kit (Set of 2) 11 lb (5 kg) $ 407
**ScreedGUIDz™**

ScreedGUIDz are adjustable screed board guides which fit any hand screed. They are designed for precise screeding of bedding material along an existing slab, pool coping, step, well caps, or PAVE EDGE. Simple adjustment allows for smooth transitions from one bedding thickness to another, allowing for slight variations of uneven surfaces. This tool also eliminates the timely task of setting pipes.

- Universal screed board guide speeds up screeding
- No modification of screed board needed
- Fast, tool free mounting
- Screed off curbs, slabs, or edging
- Works great with ScreedBOARD and wood screeds
- Made in US

**ScreedBOARD PRO™**

ScreedBOARD PRO replaces your warped wood screed boards with a true strong straight edge.

- Heavy-duty sand screed board
- High tensile strength aluminum
- Walls 0.125” (3.2 mm) thick, 2x the thickness of competition
- Durable 1” x 4” (2.5 x 10 cm) profile
- Welded ends prevent sand getting inside the board
- Made in US

**SandSCREED PRO™**

Screeds simply by pulling without the need to force the blade edge down into the bedding. Using the weight of the sand within the blade’s profile arc, SandSCREED PRO maintains downward pressure, keeping it’s edge down for you. Offers quick width adjustment without tools. Use as a standard screed board or with the Handle Set.

- Curved shape profile design "cuts" into bedding sand reducing lift
- Adjustable Screed Guide on both ends screed off an existing curb, pavement, or edging
- Level indicator (bubble) incorporated into the top of the profile
- With Positionable Handle Brackets, the handle set connects anywhere across profile- allowing one person to screed standing up when fully expanded

**SandMAX™ I**

Maximum width of 19 ft (580 cm) can be achieved with additional 5’ 9” segment. A 7 ft long crown segment is available to create a crown or swale of +/- 4% and a max width of 20 ft.

- Maintains downward force and resists lifting off rails
- High tensile aluminum alloy
- Height adjustable rollers
- Screed Width: 7 - 15 ft (210-460 cm)
- Section Length: 5’ 9” (175 cm)
- Shovel slots for manual pull & chains for loader pull

**SandMAX™ II**

Scree large areas of bedding sand or chip with precision. Create a crown or swale of +/- 4% with the crown attachment. For large commercial sites, choose SandMAX II.

- Impressively 12” (30 cm) tall screed profile allows for efficient screeding of large areas
- High tensile extruded aluminum alloy
- Fully telescopic 10 - 28 ft (3 - 8 m) with 3rd section
- No deflection at full width
- Height adjustable side rollers for rails or curbs
- Custom lengths available

**Part #** | **Description** | **Weight** | **Trade Price**
---|---|---|---
51000065 | SandMax II | 474 lb (215 kg) | $16,515
41000042 | Crown Attachment | 105 lb (48 kg) | $2,261

**UltraSCREED™**

Scree sand, chip, rock, etc. up to 1 ¼" diameter. UltraSCREED can be filled while in motion then meters out constantly through 2 independent chutes at the bottom of the hopper. Materials are screeded to the proper elevation. Adjusted and controlled by sonic, slope, and/or laser sensors.

- 50,000 sq ft/day production rates possible
- Working screed width 10 ft (3 m)
- MOBA-Matic left & right dual controls
- Dual independent hydrostatic drives
- Rubber tracks
- Cruise control
- Higher precision, faster and more maneuverable than an asphalt paver
- Designed for abrasive aggregate

**Part #** | **Description** | **Weight** | **Trade Price**

---

**COMPACTING**

**PaverPACKER® 50**

All forward plate compactors are designed to run in trenches, so the plates are long and narrow. The PaverPACKER 50 has a short, wide plate and faster travel speed resulting in a much more efficient and productive compactor. The mounted wheel kit makes it easy to move around.

- Widest and fastest forward plate in the industry
- 16” Long x 22 ½” Wide plate
- Travels 90+ ft/min on pavers
- Honda GX-160, 4.8 HP engine
- Oil bath air filter (No more filter replacement)
- Integrated wheel kit
- Perfect for 4” base lifts and setting pavers

**Part #** | **Description** | **Weight** | **Trade Price**
---|---|---|---
005010 | PaverPacker 50 | 275 lb (125 kg) | $3,315

**SurfaceSAVER MAT™**

Fill joints 4x faster!

New integrated honeycomb technology allows joint sand to spread and fill paver joints 4x faster than before! You can trim this mat to fit almost any compactor plate and use to reduce damage to textured surface pavers, clay brick, natural stone, & paving slabs. Made with special urethane material the PaverSAVER minimizes slowdown.

- Honeycomb urethane rubber mat 22” x 30”
- Helps prevent damage to textured surface pavers, clay brick, natural stone, & paving slabs
- Universal design for use on most compactors
- Trim to fit

**Part #** | **Description** | **Weight** | **Trade Price**
---|---|---|---
201505 | SurfaceSaver Mat Universal Kit | 15 lb (7 kg) | $217
005012 | Mounting Bracket 1540 & 1550 | 3 lb (1.4 kg) | $41

*NOT COMPATIBLE WITH MIKASA COMPACTORS*
**SURFACESAVER™ ROLLER PLATE ATTACHMENT**

Leading slab manufacturers recommend roller compactors to avoid damage. The process is a gentle compression of slabs/pavers into the bedding course. Rollers dampen compaction amplitude and consolidate bedding sand or chip through higher frequency vibration. This prevents the slabs from shifting and edges from chipping. The pavement is also protected from scratches caused by scraping joint sand across the surface.

- Roller diameter: 3 ¾" (9 cm)
- Secure mounting with adjustable width clamps
- SS70 Clamping Range: 15" - 22" (40 - 55 cm)
- SS90 Clamping Range: 15.75" - 25.5" (40 - 65 cm)

---

**SURFACESAVER™ ROLLER COMPACTOR**

High production for slabs, clay pavers, and planks - we introduce the SURFACESAVER Roller Compactor with 3 rollers instead of a plate. It is lighter weight, yet has higher compaction force than the competitor.

- Roller diameter: 3 ¾" (9 cm)
- Honda GX160 engine
- Compaction force 3,597 lb

---

**TwistGRIP™**

TwistGRIP TG provides a powerful grip with a simple turn of the handle. Only 2½ turns to achieve maximum lifting capacity of 175 lb (80 kg). Model TG-5/12 provides easy carrying for slabs and the TG-25/60 is for installing slabs. Both can be adjusted in seconds without tools. The Handle Extension can be attached to either TwistGRIP for better ergonomic lifting.

---

**FlatGRAB™**

Designed for handling slabs that are stacked vertically (on edge). Slabs are easily removed from a crate and laid flat on a pallet or truck bed. Intended primarily for material handling at fabrication facilities and distribution yards (not for installation). Handles all types of slabs quickly, safely, and easily.

### FastGRAB™ TSZ UNI & MULTI

Ideal for installation of stair treads, curbs, blocks, & slabs as well as rough-cut natural stone products such as outcroppings, rocks, and boulders. FastGRAB eliminates the need for lifting anchors or awkward use of slings, saving you time and money. Equipped with an automatic lock and release mechanism for maximum efficiency, the clamp is quickly and easily lifted off without aid after a product is set in place.

- **Inside Height:** 0" - 7" (18.5 cm)
- **Gripper length:** 13 ¼" (35 cm)

### BoulderGRAB™

This is a versatile 3-point clamp alternative to hydraulic grapples. Engineered with high tensile construction. The included crane loop and lifting chain adds ease of integration with any lifting equipment. BoulderGRAB is simple to operate, reliable, and requires minimal maintenance. It is perfect for smaller projects.

World famous PROBST QuickCLAMPS eliminate the need to use lifting anchors, slings to lift or forks and pry bars to set products into position. The automatic lock and release mechanism speeds the cycle time and keeps hands clear of danger. Optional Height Adjustment Brackets work with the UNI, MAXI, & MULTI.

The MULTI model can be customized for your application with several gripping options. First, Select your frame/specifications, then select the appropriate gripper option. Available grippers include rubber or urethane grippers, rock grippers or even our unique fluid filled retaining wall clamp gripper (for lifting multiple split faced blocks at once).

**FTZ MULTI. FTZ MULTI 15 D, FTZ UNI**

**FIELDCLAMP™ SG**

FieldCLAMP is an ideal standard duty clamp for saving cost by handling pavers without pallets. For use on construction sites, on delivery trucks, and in smaller distribution yards, the FieldCLAMP is a durable and versatile mechanical clamp that features automatic clamp and release operation as well as rotating fork sleeves. Operation is simple and reliable with little maintenance.

- Inside Height Adjustment: 0"- 23 ½" (60 cm)
- Gripper Length: 47 ¼" (120 cm)

**YardCLAMP™ MPZ**

The MPZ-series is a heavy-duty mechanical clamp designed for quick and easy transportation of strapped slabs, blocks and pavers in a production environment. The MPZ’s unique geometry produces greater clamping force than conventional “scissor” designs and the heavy-duty construction allows for long service life in a production environment. Automatic clamp & release allows the forklift operator to keep pace with high production output and busy truck loading schedules. The YardCLAMP is also equipped with our rotating fork sleeves for added versatility in the yard.

- Inside Height Adjustment: 0" - 23 ½" (60 cm)
- Gripper Length: 47 ¼" (120 cm)

**BandCLAMP™**

BandCLAMP is a durable and versatile mechanical clamp perfect for job sites and distribution yards. Equipped with an automatic clamp and release mechanism it’s designed for quick, safe handling of 1 - 2 full straps of banded pavers. Includes fork sleeves and long wearing replaceable rubber grips.

- Inside Height: 13" (33 cm)
- Gripper Length: 15" (40 cm)
AIRLIFT®

AIRLIFT is designed to make lifting and moving slabs, pavers and even porcelain tiles easy, safe and more ergonomic. AIRLIFT is electric, so it does not require an air compressor like most similar tools. The backpack vacuum is also very lightweight and easy to maintain.

Kit Includes:
- BackVac 110v
- One Man T-Handle
- Adjustable Center Post
- 6.5" x 6.5" Suction Plate

Part # | Description | Weight | Trade Price
--- | --- | --- | ---
CT75750 | Airlift Base Kit | 18 lb (8 kg) | $1,150

CT04039A | 10" Lift Extension | 15 lb (7 kg) | $85
CT70450A | One Hand Lift Handle | 1.2 lb (0.5 kg) | $200
CT80800 | Tile Setter Kit | 2.8 lb (1.2 kg) | $360

Mammoth® MITE VS 110v

MITE 110v turbine creates high volume vacuum. Higher than “others” compressed air converters or battery powered vacuum pumps. No Need for a heavy Air Compressor and air hoses

FAUST (“fist”) option connects easily to the MITE 110v unit for one hand lifting.

- MITE 110v Lifting capacity up to 440 lb (200 kg)
- FAUST Lifting capacity 55 lb (25 kg)
- 20+ years of lifting dry cast, wet cast, ceramic, and porcelain, smooth and textured surfaces
- Draws only 11 amps
- Adjustable handles allow different height operators and fold down for transport and storage
- Long handle option allows handling of larger (36") slabs
- Additional optional size suction plates available (see website)
- Lift kit with safety chain option available

Part # | Description | Weight | Trade Price
--- | --- | --- | ---
52700013 | MITE 110v | 45 lb (20 kg) | $2,645
42710013 | 110 lb (50 kg) Suction Plate (12" x 10") | 3 lb (1.5 kg) | $364

42710133 | "440 lb (200 kg) Suction Plate (13.5" x 33.5")" | 25 lb (11.5 kg) | $572
42710143 | Lifting Bracket w/ safety chain | 4 lb (2 kg) | $192
42710089 | Long Handle Set 36" | 18 lb (8 kg) | $458
52600013 | Feust 1-Man Vacuum Lifter Accessory | 15 lb (7 kg) | $889

*CHAIN LIFT ONLY
MAMMOTH® MITE VPH 12v

Alternative to the popular MITE 110v vacuum comes equipped with telescoping handles and height adjustment for manual lifting of larger slabs. Remove the handles for easy transport. The light weight, ergonomic design reduces fatigue, injury, and speeds installation.

- Lifting capacity: 330 lb (150 kg)
- Included suction plate size: 17 ½” x 10” (44 x 25 cm)
- Lifting loop for easy attachment to equipment
- Rechargeable 12 volt battery means no power cords or electrical source
- Perfect choice for installing granite, bluestone, porcelain or wet cast concrete slabs

STONEMAGNET™ SM

A powerful battery-operated vacuum device for handling large natural stone or precast concrete products. Designed to work well on job sites or in plant. Can be suspended from any machine using hooks, chains, slings, cables, etc.

- Lifting capacity: 1,320 lb (600 kg)
- Powered by 12 volt rechargeable battery
- Automatic Control System- automatically starts the vacuum pump in case of pressure loss
- Flashing light warns of low pressure
- High volume vacuum storage tank
- Pressure gauge and pressure release valve
- Equipped with 2 vacuum pumps

MAMMOTH® MOBILE UM

- Lifting Capacity of 300 lb (140 kg)
- Allows one worker to lift, transport, & set concrete & natural stone slabs weighing up to 300 lb (140 kg)
- Pneumatically-powered, boom lifts slabs off high stacks and gently installs
- Variety of suction plate options

MOBILE UM-VS-S Package includes:

- Laying Dolly MOBILE UM
- MITE 110v electric-powered vacuum unit (required for handling dry cast concrete)
- Various suction plate options

**SH IS a compact, powerful vacuum system.** Capacities up to 30,000 lb or more are available with the VT-Series. PAVE TECH stocks models with 2,200 lb and 5,500 lb max capacities. SH Series vacuum systems are designed to work with precast concrete and natural stone under difficult construction site conditions. Suspended from any carrier using hooks, chains, cables, slings, etc. Proven safe and reliable.

- Lifting Capacity: Up to 13,000 lb (6,000 kg)
- Quick, tool-less suction plate change
- Power options include Gas, Hydraulic, or Electric
- Positioning handle to safely maneuver device & product

*ALWAYS USE CERTIFIED LIFTING ACCESSORIES*
JM integrates vacuum hose lifting technology into a 1-man mobile platform creating a self-contained system designed to increase productivity and safety of slab installation. Using fingertip control, one installer effortlessly lifts and sets. The advanced vacuum system grips and lifts slabs allowing safe install of large, heavy slabs without fatigue. Slabs can also be easily set and reset quickly for shimming without damage.

- Lifting capacity: Up to 440 lb (220 kg)
- Exact positioning of slabs by smooth operating swing boom
- Hand operated, gear drive, telescopic mast
- Pivoting boom extendable to 13 ft (4 m)
- Pneumatic tires
- Four outriggers for safety, stability, & leveling
- Honda Model GXV270 electric start gas engine

**SlabHANDLER™**

The smaller SlabHANDLER VZ IR, VZ IS, and VZ II can be lifted by two workers or by construction equipment. Lift products quickly and safely without rigging. With three options available and an opening range between 20” to 67” (51-170 cm), the SlabHANDLER can be used for multiple applications. This versatile tool is great for job site placement of slabs and precast or granite curbing.

- Lifting Capacity: 220 lb (100 kg)
- Gripper Height: 2 ½” (6.4 cm)
- Gripper Width: 8” (20 cm)

**VZ I**
- Model R (Rubber Grippers)
- Lifting Capacity: 220 lb (100 kg)
- Gripper Height: 1 ¼” (4 cm)
- Gripper Width: 4” (10 cm)

**VZ II** (Rubber Grippers)
- Lifting Capacity: 660 lb (300 kg)
- Gripper Height: 1 ¾” (4 cm)
- Gripper Width: 8” (20 cm)

**SlabEXTRACTOR™**

- Two person slab removal
- Quick pin for fast adjustment
- Uses four extractor teeth
- Opening Range: 5” - 24” (13 - 61 cm)
- Lifting Capacity: 150 lb (68 kg)

**MECHANICAL INSTALLATION**

**PaverMax® VM 301**

Mechanical Installation offers productivity improvement beyond anything possible with manual labor alone. The key is to match the equipment to the application where it can be most effective; and offer the most payback.

- World-renowned Probst reliability
- Advanced design HVZ-UNI-II clamp is extremely strong, durable, and easy to set up and adjust
- Double articulated steering allows for rapid, maneuverable & absolute stability, featuring double-articulated steering
- Electronic joystick control (optional)
- Enclosed cab (optional)

*PLEASE CONTACT US FOR A COMPREHENSIVE DISCUSSION OF MECHANIZED INSTALLATION INCLUDING SCREEDING, SWEEPING, COMPACTION AND PAVER LAYING.*

**MaxClamp™**

- Specifically designed as excavator attachment for paver installation
- Automatic clamp and release sequence control
- Single circuit integrated controller for easy operation
- Hydraulic rotator included (requires 2nd hydraulic function)
- Swing dampening system
- Powerful side clamps can shift pavers into running bond
- Main gripping width: 23” - 49 ½” (580 - 1,260 mm)
- Side Gripping Width: 38” - 56 ½” (960 - 1,440 mm)
- Paver Thickness Range: 2.36” - 6.3” (60 - 160 mm)

**JAWS DIAMOND TOOLS / SAWS**

**PROFESSIONAL SERIES**
Professional Series JAWs Diamond Blades can cut soft, abrasive, concrete pavers, very hard fired clay pavers, natural stone or concrete wall block.
- Premium diamond blade
- Slanted gullet to help remove slurry
- Extra cooling holes allow wet or dry performance
- Combination of segmented & turbo segments
- 14 mm rim segment

**INFERNO SERIES**
Inferno series JAWs Diamond Blades are designed for wet/dry cutting with good cutting speed and good blade life.
- Great quality diamond blade
- Slanted gullet to help remove slurry
- Combination of segmented & turbo segments
- 15 mm rim segment

**CONTRACTOR SERIES**
Contractor series JAWs Diamond Blades can cut soft, abrasive, concrete pavers, very hard fired clay pavers, natural stone or concrete wall block.
- High quality diamond blade
- Combination of segmented & turbo segments for perfect combo speed & life
- 14 mm rim segment

**PORCELAIN SERIES**
Porcelain series JAWs Diamond Blades are the professionals choice for cutting porcelain tile, ceramic tile, slate, granite, and marble.
- Fast, chip free cutting
- 1 inch arbor
- 10 mm rim segment

**JAWS DIAMOND TOOLS / SAWS**

**IQ Power Tools™**

**iQ360XR**
The world’s first 14” masonry saw with fully integrated dust collection on a singular power source. Cut stone, brick, pavers, and tile inside or outside while maintaining a safe work environment.

**Part #** | **Description** | **Weight** | **Trade Price**
---|---|---|---
036015 | iQ360XR Masonry Saw | 70 lb (32 kg) | $1,950
036011 | iQ360 Rolling Table | 20 lb (9 kg) | $150
036012 | iQ360 Smart Cart | 45 lb (21 kg) | $350
036200 | iQMS362 Dry Cut Masonry Saw | 150 lb (68 kg) | $2,750

**iQMS362**
This 16.5” high performance masonry saw is dry cut and dust free with unparalleled speed and accuracy. It offers versatility in material cutting, portability, and power management.

---

**RoundOver Bits**
Long-life radius diamond grinding wheels work great on pavers, wall caps, wall blocks, natural stone—anything that needs a softer edge. Ideal for the cap edged around the top of a seating wall to make it more comfortable on the back of legs. Different radii available depending on desired curve. Includes water-fed holes for use with a wet polishing grinder, mounts to any grinder with ½” - 11” thread.

---

**Wet Variable Speed Angle Grinder 5”**
This heavy-duty 5” grinder is great for dust control with its built-in water feed. Ideal for use with JAWs grinding cups and JAWs radius grinders. There is a dial on the housing to control the variable speed (1000-4500 rpm) and features a "soft start". Control handle can be mounted on either side. Water control valve is near the rear of the housing away from the attachment.

- 12 ft cord with built-in GFI, 10 ft water line
- Perfect for job site use
- 900 watt
- ½” - 11” arbor thread

**Part #** | **Description** | **Weight** | **Trade Price**
---|---|---|---
CT55015 | 1” RoundOver | 2 lb (1 kg) | $102
CT55020 | 1.5” RoundOver | 2 lb (1 kg) | $135
CT55025 | 1.8” RoundOver | 2 lb (1 kg) | $176
CT55010 | 5” Angle Grinder | 6.6 lb (3 kg) | $213

---

**10” - 12” Blade Pricing Listed on www.Pavetech.com**
**ADHESIVES**

**SHiMZ™**
- Bonds in wet conditions
- Great for step veneering and freeze-thaw areas
- Application range: 35° - 110° F
- 60 lineal feet of bead per tube

**UltraWet™**
- Bonds pavers and wall caps in cold, damp conditions
- Non-foaming polyurethane
- Application Range: 10° F - 120° F
- 30 lineal feet of bead per small tube

---

### GRINDING Cups

**Turbo Cups**
- 18 & 24 angled segments
- Smoother finish (less swirling)
- ⁷⁄₈" - 1" threaded hub

**"T" Segment Cups**
- Fast grinding of a single row cup and smoother finish of a turbo segment cup
- Softer diamonds increase grinding efficiency
- ⁷⁄₈" - 1" threaded hub

---

### DRY Core Bits

- 10" Deep
- .014" Thick
- ⁷⁄₈" - 1" threaded hub

---

### JOINT SAND STABILIZER

**SandLOCK ADDITIVE®**
- Organic and non-toxic making it environmentally safe
- Effective against ants
- Self healing allows rebinding of loosened material

SandLOCK is for flexible and semi-rigid pavement systems. An excellent choice for concrete, clay brick, or natural stone pavements that won't stain. When activated with water, it forms a natural rubberized ‘glue’ that binds the joint sand while remaining flexible and accommodates thermal movement. It reduces sand loss due to wind, traffic, or thermal movement. SandLOCK does not dilute like water based chemical sealers or break down from UV light. SandLOCK ADDITIVE can be mixed with joint sand on the job site for an easy application.

---

---

Recommended for use with pavers, retaining walls, caps, steps, masonry, and outdoor architecture.

- 4x stronger than wood
- Superior alignment and support
- Snaps clean at the pre-scored lines
- Weatherproof polymer will not shrink, warp, rot, or split
- Never becomes brittle and resists UV damage
TRAINING & EDUCATION

FOUNDATION SKILLS VIDEO
This instructional training video and certification provides step-by-step instructions for completing both concrete and clay paver projects. This course was designed to increase segmental paving construction knowledge, efficiency, and standards through the use of industry best practices, techniques, and technology.

- Presented by the Hardscape School
- Addressed specialized installation techniques
- Certification test available to become Hardscape School Certified

- Available in English and Spanish
- Provide great basis for internal training

HARDSCAPE SCHOOL
All Hardscape School training curriculum is taught industry “Best Practices” and was developed through the input of a group of contractor “Founders”, who represent all regions of the country. Our 5,000 sq ft indoor training facility is equipped with the latest tools and equipment, and is dedicated to year round hands-on hardscape training.

The Hardscape School is committed to educating the paver industry on the “Best Practices” of hardscape construction. HS is proud to have on its administration qualified, experienced instructors and guest instructors to teach the courses. With over 100 years of combined experience and knowledge, we assure you, our students walk away learning labor efficiencies and communication skills that enable them to share their learned skills with other hardscape professionals.

Hands-On Courses Focus:
- Efficiencies
- Productivity
- Leadership
- Industry Best Practices
- Leadership Challenges & Field Management Skills
